

Environmental Policy

Green Maritime Limited acknowledges the local, national and global environmental impacts caused by our business activities such as our use of raw materials, natural resources, transportation and energy, our generation of waste and our need for business travel and logistics.

We accept our responsibility to put in place a strategy that will mitigate these impacts on our staff and customers, our society and the environment, so far as reasonably practical.

We will provide sufficient resources to meet this responsibility and to maintain, monitor and where necessary, improve environmental performance.

It is the policy of Green Maritime to:

- Comply with relevant environmental legislation and other requirements relating to our environmental aspects,
- Prevent pollution by our business activities, so far as is reasonably practical,
- Continually improve our environmental performance and our environmental management system,
- Educate and train our employees to work within the policy

The policy is endorsed by senior management, it will be reviewed annually for continuing suitability and adapted if necessary.

Green Maritime Limited has set a number of environmental objectives that are driven by targets and supported by an action plan. These are reviewed at our Management Review meetings and new objectives are set as required.

A handwritten signature in black ink, appearing to read 'Mark Jubb', is written over a faint circular stamp.
